SUMMARY

I am a dedicated *Full Stack Developer* with strong expertise in both *front-end and back-end technologies*. Currently pursuing a *B.Tech in Computer Science*, I have honed my skills in various programming languages and development tools. I possess a solid understanding of software development practices and have hands-on experience in building applications, highlighted by my project '*Reusebook*'.

PROJECTS

Reusebook App — Personal Project

A mobile application facilitating the buying and selling of used books.

- Developed '*Reusebook*,' an interactive Android application enabling students and second-hand bookshop owners to buy and sell books.
- Implemented *user authentication* (signup, login, and password recovery) with secure *JWT-based access*.
- Utilized *MongoDB* to store book and user details while securing sensitive information, such as passwords, using *bcrypt*.
- Built using *Flutter*, *Node.js*, *Express.js*, *MongoDB*.
